

MEMORANDUM
Academic Affairs

TO: Joyce Scott, Deputy Commissioner of Higher Education
FROM: Susan Patton, VCAAR
DATE: May 7, 2003
CC: D. Coe, K. Van Daveer
RE: Nursing articulation

With the approval of the Nursing Program changes at Montana Tech the request for an articulation with the other campuses in MUS was requested. Attached please find the articulation within the general education.

The intake into clinicals for the ASN occurs in January of each year. Normally 40 students are accepted. Acceptance is based on the GPA in the coursework of Introduction to Nursing, General Psychology, Anatomy and Physiology I, Introduction to General Chemistry, and English Composition. In addition Algebra will be included in subsequent years. Articulation of these courses is included in the tables that follow.

Admittance into the BSN completion program requires that a student possess a valid RN license and have met the ASN general education requirements. This validates prior learning and enables the students to work under their own licensure.

Throughout the state, nursing coursework in the current AAS PN program is block transferred. Please note that the campus agreed to convert the AASPN to the certificate level. Those changes will be brought to the OCHE in preparation for the July BOR meeting.

Occasionally a prospective nursing student seeks credit for nursing coursework at the RN level. The courses are individually articulated on a case-by-case basis from RN level coursework. This past year students seeking admittance into the RN program have requested consideration of their LPN coursework from other campuses. The most frequently transferred coursework is at the fundamentals level. The student provides a syllabus from the course and the instructor and director of nursing determines the acceptance.

**Transfer of Credits from Montana Institutions of Higher Education to Montana Tech Nursing
