Caveat: The state support is derived from in-state FTE generated by in-state students taking the aforementioned courses. However, DCC does not consider these courses to be "State funded" in nature, as the student, not the course, determines any funding by the State. These courses are "brokered" for delivery through the Colorado Community College consortium rather than being developed and delivered by DCC. Thus, students do have access to these courses via DCC, but they are not technically DCC-developed courses.
