

Playing an Elluminate Recorded Session

1. **Basic Controls:** layout, playback controls, and 'scrubbing'.

The screenshot displays the Elluminate Live! interface for a recorded session titled "MUS WEBINAR (30 OCTOBER 2008)". The interface includes a menu bar (File, Session, View, Tools, Window, Help), a toolbar, and a main content area. On the left, there are panels for "Participants" (showing 19 participants), "Chat" (with a message from "Bozeman - BTC @ MSU"), and "Audio - John Graves" (with a "Talk" button). The main content area shows a "Whiteboard - Main Room (Scaled 85%)" with a slide titled "Slide 12" and a diagram. The diagram consists of five blue rounded rectangles arranged in a circle, connected by arrows: "Assignments" at the top, "Required Readings" on the right, "Written Assignments" at the bottom right, "Discussion Participation" at the bottom left, and "Due Dates" on the left. A "Protected" label is visible in the top right corner of the whiteboard. At the bottom, there are playback controls (play, stop, next, previous) and a progress bar showing "19:58" and "In session for 1 hour, 5 minutes." Two callout boxes provide instructions: "Even in playback, you can adjust the screen layout." pointing to the window title bar, and "You can 'scrub' forward by clicking and dragging the play head." pointing to the progress bar.

2. The recording is indexed, allowing you to find what you might be looking for.
