ITEM 183-105-R0519

Revisions to the Performance Funding Model – Under-represented Groups

THAT

The Board of Regents adopts recommendations for revising the performance funding model in order to strengthen the connection between the performance metrics for under-represented student groups and the allocation of performance funds.

EXPLANATION

In the current model, the metrics for under-represented/at-risk student groups (i.e. American Indians, veterans, low-income, and non-traditional students) are utilized to generate bonus points. This recommendation integrates the metrics for under-represented/at-risk students into the portion of the model that determines the overall allocation of funds at each campus. The distribution of funds based on these recommendations will take effect beginning with the FY 2021 allocation of performance funds next year.
