												We are requesting new course fees for non-majors enrolled in our studio lab classes,
												several of which are IA core offerings. The classes include a significant amount of
												materials and are now paid for with art major program fees. Each section includes both
												major and non-major participants, and due to the collaborative nature of the course
												work the materials and supplies must be shared. It is not fair for the art majors to bare
												the entire costs for the course. The spreadsheet provided outlines the costs for the
												classes. We are also requesting a course fee of \$100 for the ARTZ 251 Beginning

	JUSTIFICATION OF FEE CHANGES
	We are requesting new course fees for non-majors enrolled in our studio lab classes,
	several of which are IA core offerings. The classes include a significant amount of
	materials and are now paid for with art major program fees. Each section includes both
	major and non-major participants, and due to the collaborative nature of the course
	work the materials and supplies must be shared. It is not fair for the art majors to bare
	the entire costs for the course. The Foundation Classes, ARTZ105IA, ARTZ 109IA and
	ARTZ 110IA are also offered to nonmajors and represent 49% of the student population.
	The combined material expense for these classes is \$3226. We are requesting a \$15 fee
15 per non-major Student	per student to help offset their material and supply cost.
	We are requesting new course fees for non-majors enrolled in our studio lab classes,

15.00 fee per non-major student	per student to help offset their material and supply cost.
	We are requesting new course fees for non-majors enrolled in our studio lab classes,
	several of which are IA core offerings. The classes include a significant amount of
	materials and are now paid for with art major program fees. Each section includes both
	major and non-major participants, and due to the collaborative nature of the course
	work the materials and supplies must be shared. It is not fair for the art majors to bare
	the entire costs for the course. The spreadsheet provided outlines the costs for the
	classes. The ceramics studio is the most intensive material cost studio with \$10,733
	annually in just ceramic
	materials, serving both ARTZ 231RA Beginning Ceramics and ARTZ 332 Intermediate
	ceramics. This is made up of 38% non- majors using \$4079 worth of materials, or \$583
	per student. We are requesting a \$200 course fee to offset this cost. This is a reasonable
	amount for what is offered in the class, and in line with lab fees for independent ceramic
200 fee for non-majors taking Ceramics	classes in the field.

d trips	
	The proposed fee will cover payment for trainers hired to provide specific management/leadership training associated with the literature covered in the class, but which is outside the expertise of the instructor. The training has been provided in three previous semesters, and was covered by various one-time sources, including Faculty Senate leadership compensation and sales and service activities conducted by the instructor. There is no stable source of funding within the Department's budget to cover this cost, so the experience will be removed from the course if the proposed fee is not
hin item a) of BoR Policy 940.31, i.e. fees to	approved. It should be noted that the proposed course fee is the only expense (aside
es or equipment fees, where payment is made	from institutionally charged tuition and fees) for the course. That is, all readings are
enerally conducting these types of activities	provided electronically by the instructor within the current LMS, and there are no texts or
powling, etc.)," in this case to pay trainers who	other materials that students are required to purchase. The proposed fee is below the
g activity.	average per-class estimate of books/supplies costs at MSU.

	Proposal to add \$50 course fee for CSCI 583: Integrating Computer Science in Science
	Classrooms. This course is offered by the Master of Science in Science Education Program. It includes course supplies that are purchased by MSSE and sent to each student. There is currently
	no fee to cover the cost of the supplies and shipping.
	Cost breakdown:
	Microbit = \$29.60 Alligator Clips = \$1.50
	LEDs = \$0.27
	Conductive Thread = \$5.50
	Sewing Needles = \$1.11 Felt = \$1.27
	USB Cords= \$1.36
	Supplies total = \$40.61 Shipping = \$10 (estimated)
	Shipping - \$10 (estimated)
	= \$50.61 total/student
	Student input:
	Student input: A survey was sent to 38 MSSE students who are in their second year of our graduate program. The
	survey had one question: "CSCI 583: Integrating Computer Science in Science Classrooms is a
	hand's on MSSE course that requires course supplies that are sent to each student. Currently,
	there is no course fee to offset the cost of the course supplies and shipment of the supplies to the students. We are proposing adding a course fee of \$50 to offset the cost of supplies and shipping.
	If approved, the new course fee would start in fall 2025. As an MSSE student, would you support
	the proposal to add a course fee? Three students responded to the survey. 100% of the
d shipment of supplies to students	respondents replied "yes" Fund for course would be 433618.

												GEO 585 is a field course that requires vehicle rental and gas. The fee would cover those
												costs. Proposal to add \$50.00 course fee for GEO 585: Mineralogy for Teachers. This
												course is offered by the Master of Science in Science Education Program. It is a day-long
												summer field course that includes transportation. However, there is currently no course fee to cover the cost of transportation. The proposed \$50 fee would cover the
												transportation cost.
												Cost breakdown: The course uses 2 SUVs or vans which cost \$90/day/vehicle. Gas for
												transportation costs \$35/vehicle. (estimated).
												\$180 (vehicle rental) \$70 (gas)
												\$70 (gas)
												Total=\$250/5 students = \$50 per student
												Student input:
												A survey was sent to 38 MSSE students who are in the second year of our graduate
												program. 3 students responded to the survey. They were asked the following question:
												"GEO 585: Mineralogy for Teachers is a one-day MSSE field course that requires vehicle
												rentals and gas. Currently, there is no course fee to offset the cost of transportation. We
												are proposing adding a course fee of \$50 to offset the cost of transportation. If
												approved, the new course fee would start in fall 2025. As an MSSE student, would you

												GEO 585 is a field course that requires vehicle rental and gas. The fee would cover those
												costs. Proposal to add \$50.00 course fee for GEO 585: Mineralogy for Teachers. This
												course is offered by the Master of Science in Science Education Program. It is a day-long
												summer field course that includes transportation. However, there is currently no course
												fee to cover the cost of transportation. The proposed \$50 fee would cover the
												transportation cost.
												Cost breakdown: The course uses 2 SUVs or vans which cost \$90/day/vehicle. Gas for transportation costs \$35/vehicle. (estimated).
												\$180 (vehicle rental)
												\$70 (gas)
												Total=\$250/5 students = \$50 per student
												Student input:
												A survey was sent to 38 MSSE students who are in the second year of our graduate
												program. 3 students responded to the survey. They were asked the following question:
												"GEO 585: Mineralogy for Teachers is a one-day MSSE field course that requires vehicle
												rentals and gas. Currently, there is no course fee to offset the cost of transportation. We are proposing adding a course fee of \$50 to offset the cost of transportation. If
												approved, the new course fee would start in fall 2025. As an MSSE student, would you
												support the proposal to add a course fee?" Three students responded to the survey.

ld trips	Increased Cost of Consumables
	We continue to expand our inventory of musical instruments and equipment needed for performance to address historical deficiencies in meeting student performance needs. The additional instruments have increased our overall maintenance costs along with cost increases that are industry wide. As the School of Music continues to create a civil, supportive, and respectful environment where difference and diversity are sources of strength (MSU's Strategic Plan, Values: Inclusion), our goal to perform music by underrepresented populations, many who are also living composers, continues to lead to higher costs for purchasing and renting music. Scores by living composers generally cost more than historical works. Along with the increased costs of purchasing/renting music for our current offerings, there will be an increased need to fund the purchase/rental of music for the NEW MUSI 108IA - MSU String Orchestra. The course is designed for non-music majors wanting to continue their orchestral ensemble studies who desire a more traditional 3 contact hour course. We have also seen an increase in costs for piano tuning and maintenance based on changes in service contracts. We have proposed a significant increase in building/venue rental needs. As part of our recent accreditation review (NASM), the Visitors' Report stated concern regarding adequate performance spaces that meet the acoustical and stage requirements.
tenance, accompanist costs, music ilding rental and concert production, nance equipment purchase and maintenance, and	Course Fee increases larger than 2% have been requested for ensemble courses, we are seeing increases directly related to instruction - increased costs for accompanists, music rental/purchase, instrument maintenance, building/venue rental, and concert production costs. We are requesting a NEW Music Program fee which will replace current course fees for several MUSI courses and reduce course fees for applied lessons - MUSI 102, 195, 295, 395, 495, 595. We have had discussions with students enrolled in affected MUSI courses in their individual classes and at Music Seminar. Students enrolled in these courses overwhelmingly support the proposed changes in MUSI course fees.

Program Fee for Music Education Majors.	 Over the past two years, we have seen an increase in replacement costs for consumable goods used in our graduate skills and simulation labs. We have also experienced added expenses for clinical travel and wages of the placement personnel. We anticipate these expenses to continue to rise over the next two years. Music Education Program Fee The proposed MUED program fee will replace course fees for the (a) purchase and emaintenance of specialized equipment, techniques instruments, and specialized software associated with MUSE 130, MUSE 131, MUSE 132, MUSE 134, MUSE 135, and MUSE 220 required for all Music Education Majors. The proposed program fee will also assume (a) specific costs for accompanists in support of choral conducting, (b) student
												persistence to degree, (g) and costs associated with guest artists to	travel expenses, (f) activities and initiatives to improve student persistence to degree, (g)

													Music Technology Program Fee Increase We are seeing an increase in the cost of specialized equipment, software, maintenance, student employment wages, and guest artist costs. Student labor costs are directly tied to pay changes initiated to attract and maintain qualified student workers who have more lucrative opportunities outside of the university. Student workers compensated from the Music Technology program fee are employed in Equipment Checkout in Howard Hall. These students maintain the inventory of equipment and distribute equipment to students so that they can complete their assignments and succeed in their courses. Qualified student workers allow our Music Technology students to have flexible equipment requests and checkout/drop off times and verify that equipment in checkout is maintained. Music Technology Students have overwhelmingly requested that access to equipment through equipment checkout be continued and, if possible, expanded.
												Program fee for Music Tech Majors.	We are seeing an industry wide increase in costs related to specialized equipment, software, and maintenance. We are also anticipating an increased need for funding to support the purchase of needed equipment and software along with increased maintenance and repair costs to support additional Music Technology spaces in Gianforte Hall starting in Fall 2026 (FY27). Additional funds that are collected through the MTEC program fee in will be set aside in the MTEC Repair and Replace Index (46E700) to support equipment costs anticipated for outfitting and supporting the additional spaces in Gianforte Hall.

										Program costs, including NSE membership dues, NSE conference registration, and
										travel costs to the NSE conference, have all increased in the past two academic years.
										The proposed increase in the incoming student fee will go towards covering these
										increased costs while providing a financial buffer during variable student participation.
										Without an increase in the fee amount, the program is very likely to run out of funds, resulting in additional stress on the University Studies state-funded budget. Current
										inbound NSE students were surveyed and 80% support the fee increase. Please see the
										attached documentation for an itemized breakdown of program costs and revenues,

Escalating Fines: Fines that escalate increase \$10 each subsequent time they are issued to the same vehicle in the same academic year (e.g. a \$35 ticket will increase to \$45 the second time it is issued, then \$55, and so on). Once a fine has escalated three times, the violation becomes a towable offense. Escalations reset August 1 each year.

osed Changes
